

Michigan’s Economy Depends on Worldwide American Companies

Michigan's 856 worldwide American companies and their employees need a level international playing field to prosper and grow. These companies support substantial employment and economic output in Michigan, directly through their production of goods and services, through their suppliers, and through spending by the people they employ.

If the Congress raises international taxes on worldwide American companies – while other nations are adopting more competitive tax structures – it will put Michigan companies and their employees at a competitive disadvantage with their foreign competitors and jeopardize the substantial contributions they make to Michigan’s economy.

The Economic Contribution of Worldwide American Companies in Michigan, 2007

	Direct Contribution*	Indirect Contribution**	Total Contribution	Total Contribution as a percent of State Total
Jobs	886,300	1,555,900	2,442,200	52.0%
Payroll	\$68.9 B	\$69.9 B	\$138.8 B	63.0%
Value-Added	\$115.4 B	\$115.9 B	\$231.3 B	65.1%

*The direct contribution consists of employment in and the payroll and production of worldwide American companies in the state.

**The indirect contribution consists of employment, payroll, and production supported by worldwide American companies through their supply chains and the consumption spending of the people they employ directly or indirectly.
